Hello,

The production of mRNA therapeutics and vaccines is a complex process that begins with pDNA manufacturing and ends with fill and finish by using different delivery technologies.

Do you want to learn more about one-stop solution for mRNA CMC. Join this webinar and discuss with GenScript ProBio's director of platform R&D department, Dr. Xiao Pan.

In this webinar, you'll learn:

- Introduction of ProBio and service landscape
- Progress in mRNA technologies
- IVT mRNA CMC development considerations
- mRNA delivery system CMC considerations
